

## The Top Ten Advantages of the **INTEK** series.

**1. No boiler or conventional generator.**

No traditional deliming, boiler maintenance or harsh chemicals. Just reliable, powerful steam.

**2. No water line.**

No water connections required at install, no solenoid valves to go bad or plug up. No drain connections required. Plug the unit in, and add water.

**3. Cooks fast.**

Its high performance heating design combined with convection fan cooks 48lbs of frozen vegetables in only 17 minutes.

**4. Uses less water than conventional steamers.**

Lowest water consumption in the industry. When you're paying for the water and waste bills, that matters.

**5. Uses 67% less energy than conventional steamers.**

ENERGY STAR® certified. The most energy efficient steamer on the market, lowering your utility bills, saving you money.

**6. No traditional maintenance or deliming.**

Simply wipe out the chamber at the end of the day with 50/50 vinegar and water solution and your cleaning regimen is done. It's that easy.

**7. NSF holding unit.**

Doubles as a NSF approved holding cabinet to store pre-cooked product when upcoming demand requires it. (on electric units only)

**8. No probes or floats.**

No floats to stick and no probes to clean, saving time and troublesome maintenance calls. (on electric units only)

**9. Cooks evenly throughout the cooking chamber.**

Powerful inverted flow convection fan ensures even distribution of steam in the cooking compartment eliminating cold spots.

**10. Solid state controls.**

No boards or electronics to go bad, just good old mechanical components, lessening your warranty costs.
